NGUYỄN XUÂN TRỌNG

Mobile Developer | Flutter Developer | React Native Developer

0333759182
trongnguyenxuan2001@gmail.com
Hà Nội

CAREER OBJECTIVE

Mobile Developer specializing in **Flutter** and **React Native** with experience in building and optimizing real-world applications in **Fintech** and **Product-based applications**. Experienced in developing high-performance mobile applications, integrating APIs, handling realtime data, and improving user experience. Seeking opportunities to contribute technical skills, build scalable mobile products, and grow toward a **Senior Mobile Developer** / **Technical Lead** role.

EXPERIENCE

BOLT TECHNOLOGIES JSC

03/2025 - Present

Mobile Application Developer

- Integrated REST APIs and handled realtime data using WebSocket for stock price and transaction status modules.
- Developed trading order flows, portfolio management features, and realtime data synchronization.
- Implemented JWT authentication, secure storage, and security solutions to protect user data.
- Optimized application performance by reducing screen loading time and improving realtime data processing efficiency.
- Refactored existing codebase and proposed architectural improvements to enhance scalability and maintainability.
- Developed HTML-based mini-game features and integrated them into mobile applications through WebView.
- Integrated third-party SDKs including VNPAY eKYC, FPT.AI eKYC, Firebase Messaging, and WebView Bridge.
- Participated in developing user authentication, digital identity verification, and transaction security flows for financial applications.

TINASOFT VIETNAM JSC

05/2023 - 03/2025

Mobile Developer / Frontend Developer

- Developed mobile applications using Flutter and React Native for multiple production projects.
- Worked onsite with enterprise partners including **Rivernet Vietnam**, **Sumikura**, **Annalink**, and **Viettel High Tech**.
- Developed UI, integrated APIs, implemented business logic, and maintained application source code.
- Fixed production bugs, optimized application performance, and collaborated with customers throughout the development lifecycle.
- Worked on multiple domains including utility applications, education, logistics, and enterprise systems.

VNPT INFORMATION TECHNOLOGY COMPANY

10/2022 - 01/2023

Frontend Intern

- Participated in developing and maintaining internal enterprise web systems.
- Built UI components based on design specifications and integrated basic APIs.
- Supported bug fixing and collaborated with team members during the development process.
- Learned and applied enterprise software development workflows.

PROJECT

Upstock Investment Application - UP Securities

03/2025 - Present

Mobile Application Developer

A financial investment application that allows users to manage assets and perform online transactions.

- Developed major modules including Bonds, Investment Portfolio, Order Book, and Transaction History with realtime data updates.
- Integrated WebSocket for realtime price updates and transaction status synchronization.
- Designed and implemented buy/sell order flows ensuring data accuracy and consistency with backend services.
- Managed application state using Bloc / Riverpod and optimized data handling for high-frequency updates.
- Improved UI rendering performance and minimized unnecessary widget rebuilds.
- Applied JWT authentication, local data encryption, and session management for user security.
- Built Flutter-WebView communication bridge to synchronize user data and application states.

Service Test - Viettel High Tech

11/2024 - 03/2025

Frontend Developer (Onsite)

Internal system for service testing and technical workflow management.

- Worked onsite directly with Viettel High Tech team.
- Developed web interfaces using ReactJS and TypeScript.
- Integrated APIs and implemented business requirements.
- Supported feature development, bug fixing, and system performance optimization.
- Collaborated closely with customer teams to ensure project delivery.

F1 Homes / Finra Capital

07/2024 - 10/2024

Flutter Mobile Developer (Onsite)

Financial application for investment and digital asset management.

- Participated in project structure development and implemented new features based on business requirements.
- Developed UI based on Figma designs and optimized animations and user experience.
- Integrated backend APIs and handled business logic.
- Worked directly with partners to clarify requirements and deliver suitable solutions.
- Supported bug fixing, performance optimization, and product release preparation.

Annalink Porter - Annalink JSC

04/2024 - 08/2024

Mobile / Web Developer (Onsite & Remote Collaboration)

A consulting and study abroad management system including Mobile App and WebApp.

- Developed Mobile App using React Native and WebApp using NextJS.
- Built base project structure and implemented features based on customer requirements.
- Converted Figma designs into production-ready interfaces with responsive layouts.
- Collaborated with customers and BA teams to clarify business requirements.
- Integrated APIs, fixed production issues, and improved system stability.

Lunar Calendar Application - Rivernet Vietnam JSC

03/2024 - 05/2024

React Native Developer (Onsite)

A mobile application supporting lunar calendar lookup and related utilities.

- Participated in managing and developing projects with a small development team.
- Developed main application features using React Native.
- Designed data processing flows to support both online and offline modes.
- Optimized data structure, loading speed, and user experience.
- Fixed bugs, improved performance, and delivered features on schedule.

Sumikura - SK Investment JSC

10/2023 - 03/2024

React Native Developer (Onsite & Remote Collaboration)

Mobile application for air conditioner and home appliance service ecosystem.

- Developed mobile applications using React Native.
- Built UI based on Figma / Photoshop designs.
- Integrated APIs and implemented core application features.
- Managed technical tasks and supported team members during development.
- Fixed bugs on Jira, optimized UI/UX, and improved user experience.

EDUCATION

09/2019 - 06/2023

Information Technology Major

University of Economics - Technology for Industries (UNETI)

GPA: 3.18 / 4.0

Bachelor's degree in Information Technology with knowledge of programming, data structures, databases, and software development.

HOBBIES

- Technology and digital products
- Exploring new trends in Mobile App development
- Sports
- Traveling

SKILLS

Mobile: Flutter, Dart, React Native

Frontend: ReactJS, NextJS, TypeScript

Third-party SDK: VNPAY eKYC, FPT.AI eKYC, Firebase Messaging,
Deep Link, WebView Integration

Fintech: eKYC, OCR, Face Matching, Liveness Detection, Trading Flow, Portfolio Management

State Management: Bloc, Riverpod, Provider, GetX, Redux

Networking: REST API, WebSocket, Realtime Data Handling

Security: JWT Authentication, Secure Storage, Data Encryption

Tools: Git, Jira, Postman, Firebase

Performance: App Optimization, Memory Management, UI Rendering Optimization

Strengths: Problem Solving, System Thinking, Teamwork
